

1. Fer visible un mòdul de la instal·lació de Joomla!

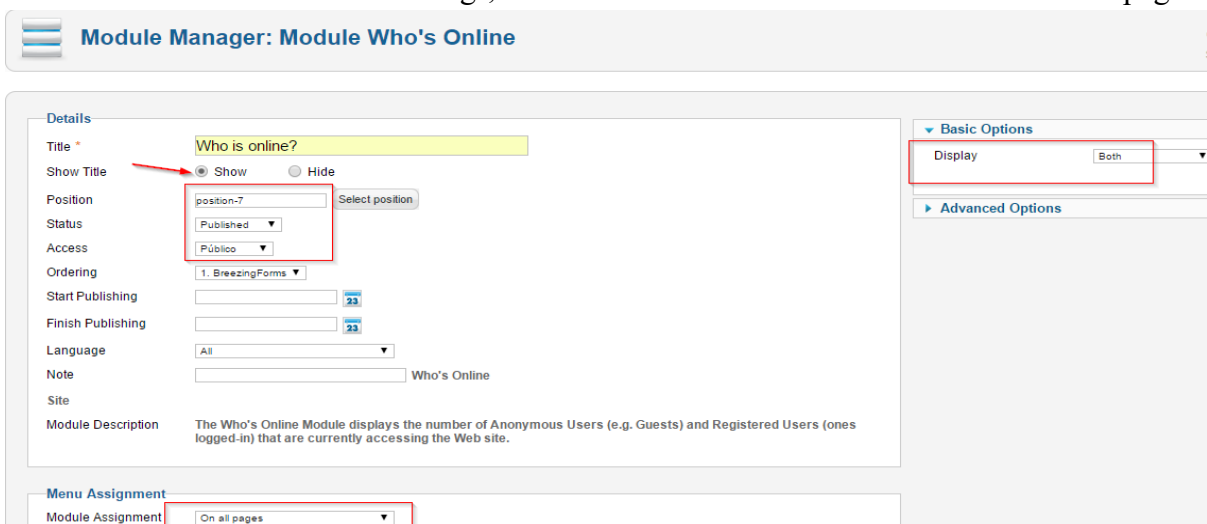

For to show a module, we have to go the backend and select Module Manager:

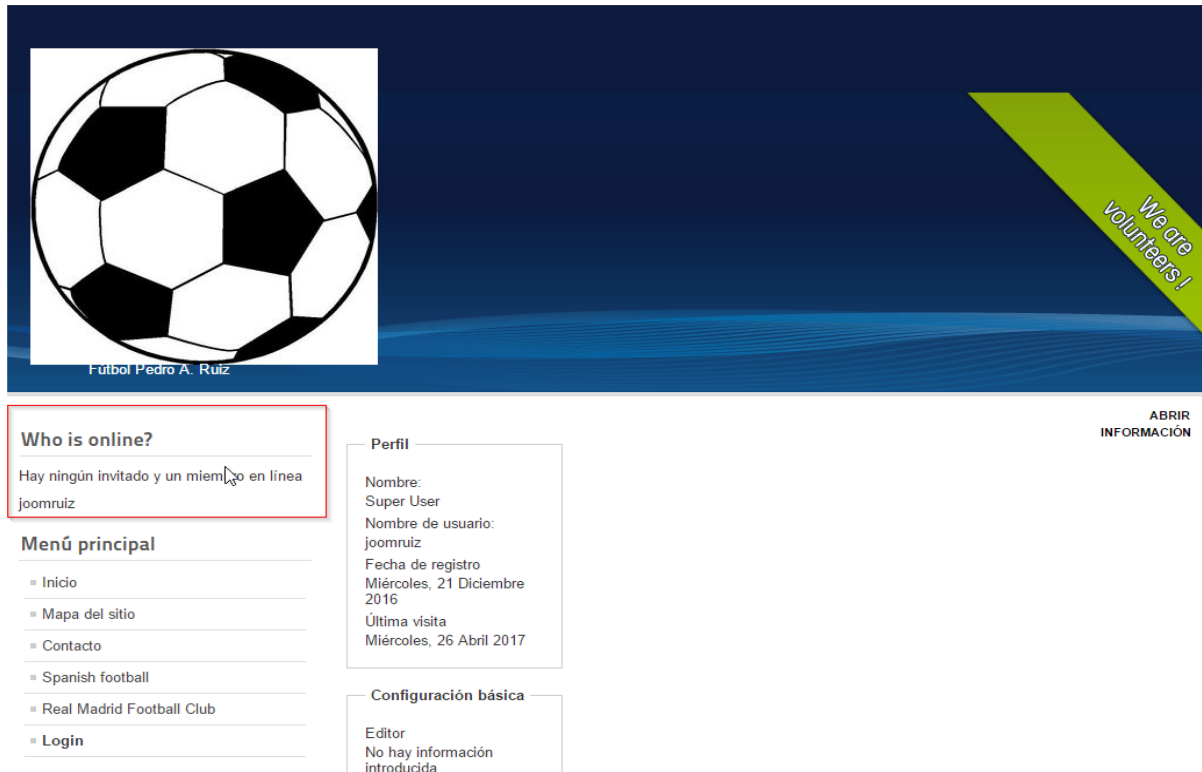

Select “New” and the Module type which we want to show in the Frontpage:

Once we have filled the basic settings, we have to “Save” and refresh the Frontend webpage:

We check if the new Module is shown in the website:

The screenshot shows a Joomla! website interface. At the top, there is a banner with a soccer ball image on the left and a green diagonal banner on the right that says "We are volunteers!". Below the banner, the text "Fútbol Pedro A. Ruiz" is visible. On the right side, there is a link that says "ABRIR INFORMACIÓN". On the left side, there is a sidebar with the following sections:

- Who is online?**
Hay ningún invitado y un miembro en línea
joomruiz
- Menú principal**
 - Inicio
 - Mapa del sitio
 - Contacto
 - Spanish football
 - Real Madrid Football Club
 - Login
- Perfil**
 - Nombre: Super User
 - Nombre de usuario: joomruiz
 - Fecha de registro: Miércoles, 21 Diciembre 2016
 - Última visita: Miércoles, 26 Abril 2017
- Configuración básica**
 - Editor: No hay información introducida

2. Instalar una extensió que sigui un mòdul

I will install "RS Cool Mp3 Player" to hear the different hymns of football teams. I will download it from <https://extensions.joomla.org/extension/rs-cool-mp3-player/> :

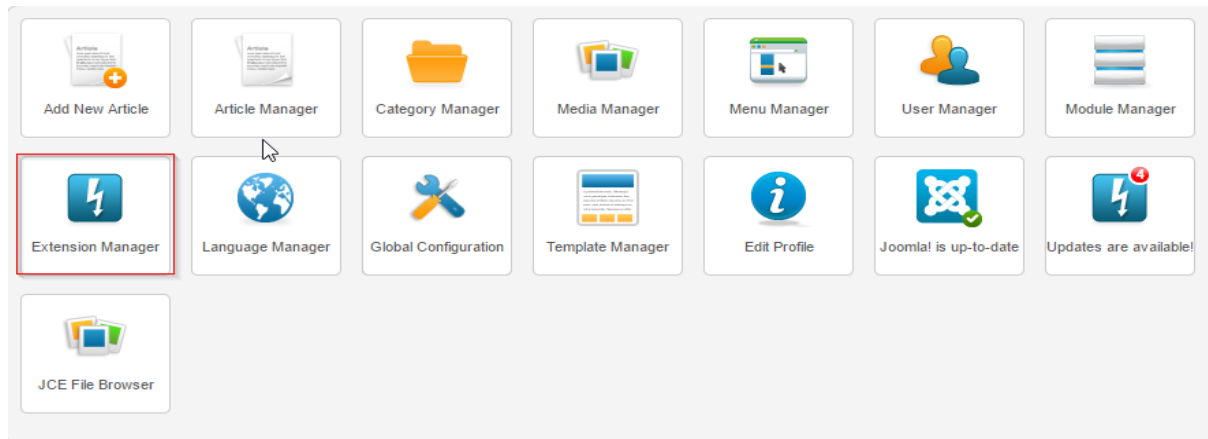

The screenshot shows the details of the "RS Cool Mp3 Player" extension on the Joomla! Extensions website. The title "RS Cool Mp3 Player" is highlighted with a red box. Below the title, the following information is displayed:

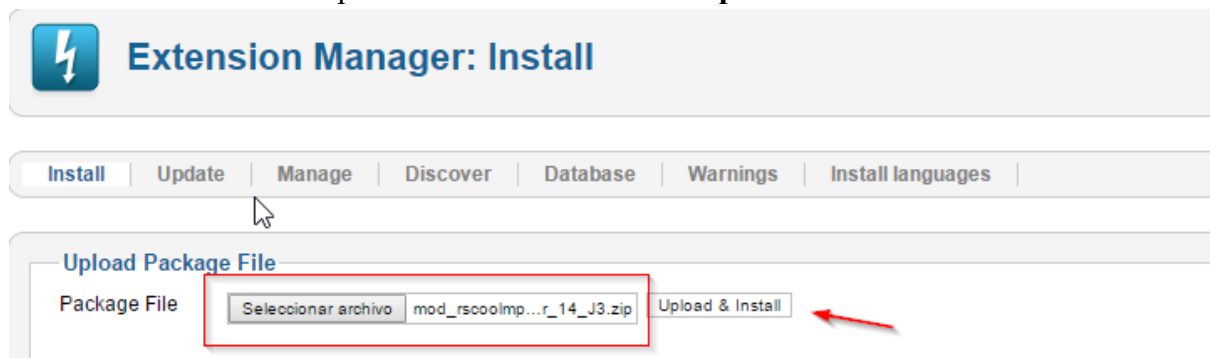

- Version: 1.4
- Developer: RS Web Solutions
- Last updated: Dec 23 2014
- Date added: Nov 18 2014
- License: GPLv2 or later
- Type: Free download
- Includes: 1 (indicated by a red circle with the number 1)
- Compatibility: 3 (indicated by a yellow circle with the number 3)

A red arrow points to the "Download" button, which is an orange button with a download icon and the text "Download".

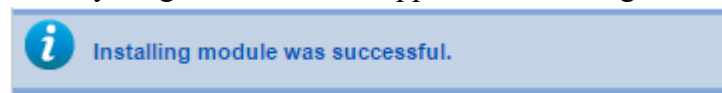

Once we have downloaded the extension, we go to the backend to **upload and install** it. This time we have to go to the option “Extension Manager”:

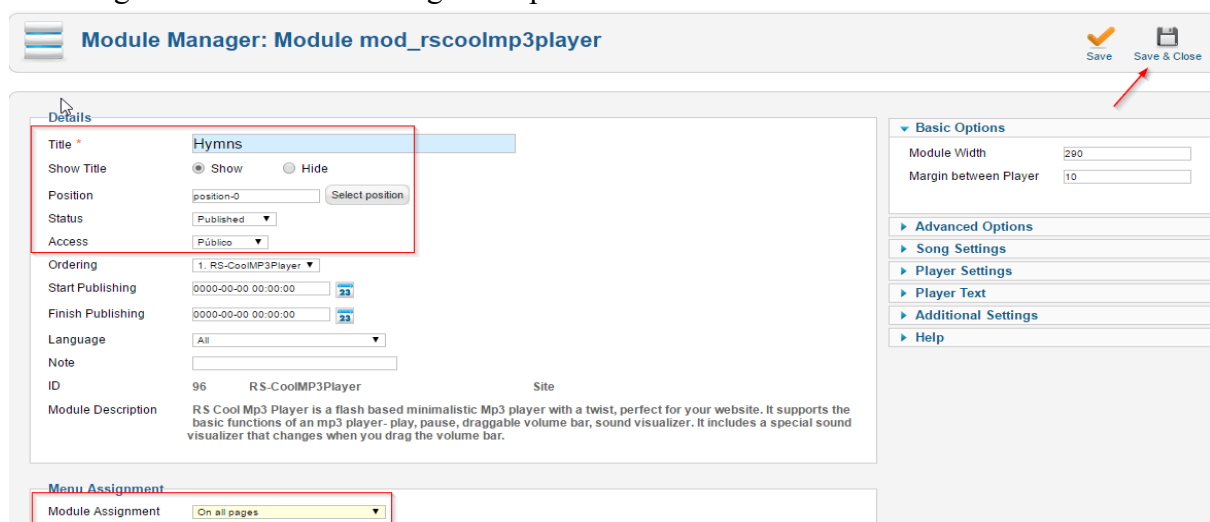

Select the downloaded zip from folder and click on “**Upload & Install**”:

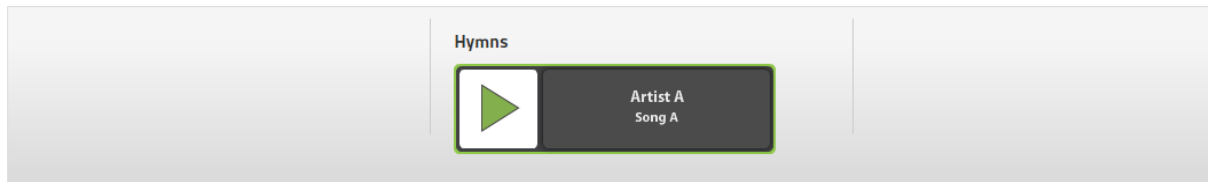

If everything went well, will appears this message:

We can go to the Modules Manager and publish the module as we have done on **exercise 1**:

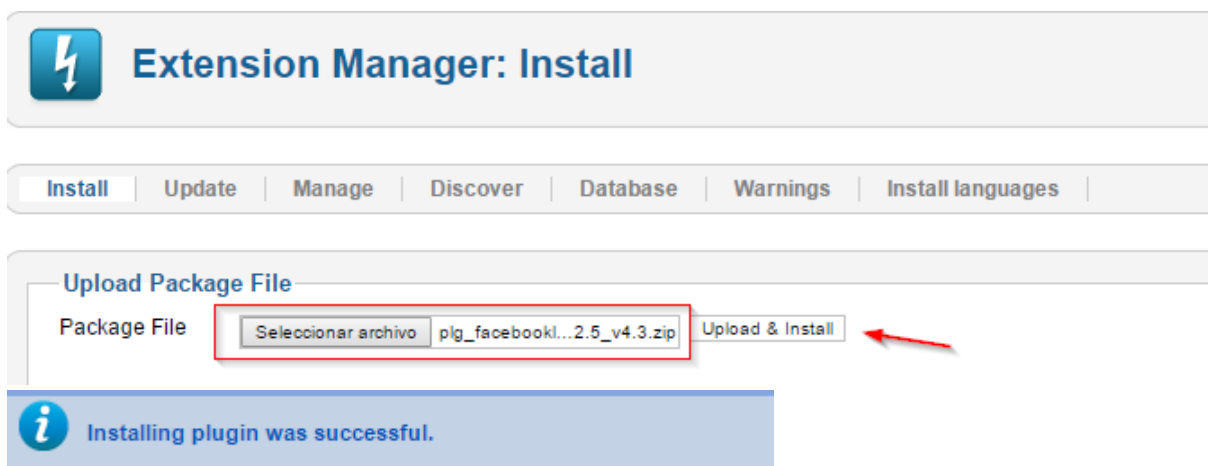

Refresh frontend page and the module has been successfully installed:

3. Instalar una extensión que sigui un plugin

We search for a Plugin in the same page as before and download it:

<https://extensions.joomla.org/extension/facebook-like-and-share-button/>

We load it as we have done on exercise 2.

Once it's uploaded and installed, we can go to *Extensions* → *Plug-in Manager*, click on the *installed plug-in* and make the configuration to show it in the Articles:

4. Instalar una extensión que sigui un component

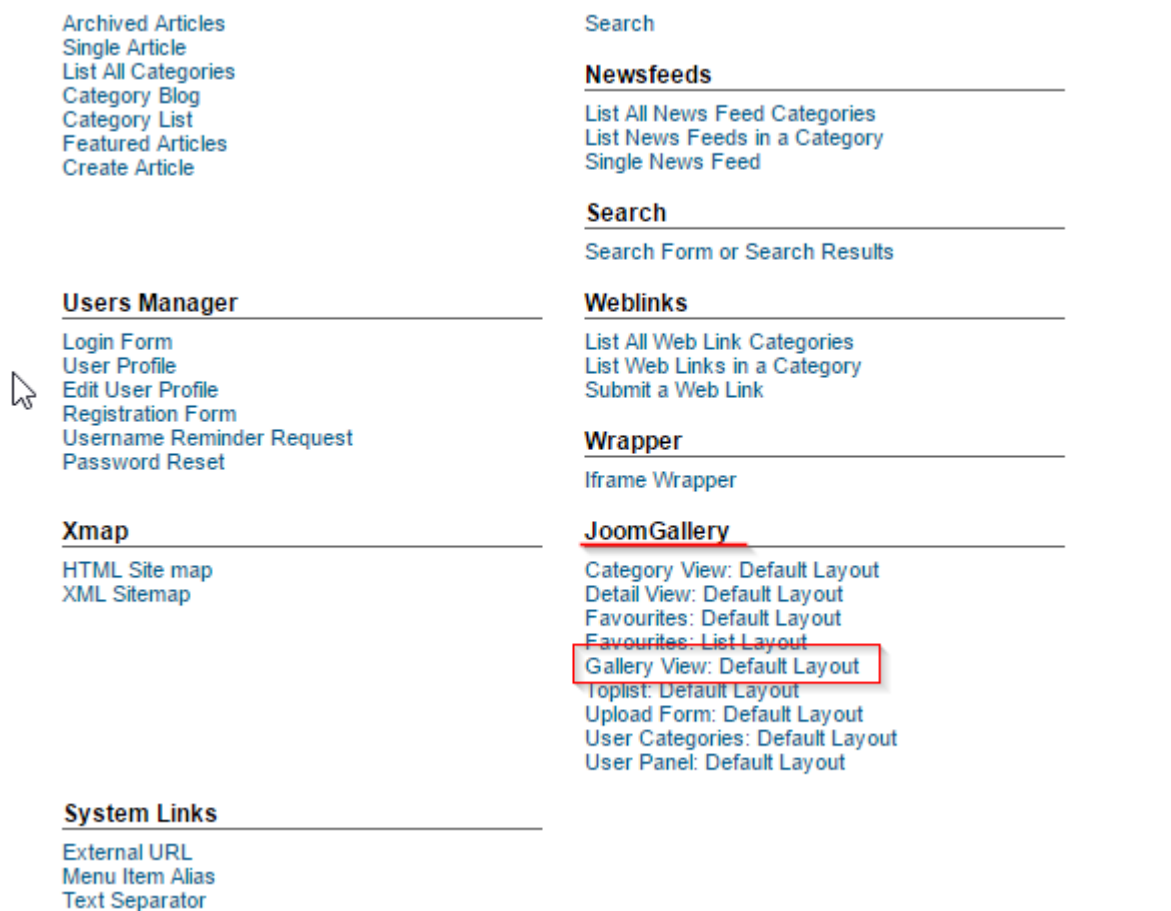

In this case we will use the website www.solojoomla.com and we will select a component to download and install, following the same procedure as on the previous exercises.

JoomGallery | Galería imágenes para Joomla

Son muchas las **extensiones joomla que permiten crear galerías de imágenes**, pero pocas son las que consiguen una claridad y navegabilidad tan buena como **JoomGallery**. Tras la desaparición y reaparición tardía y posterior de **RSGallery**, he creído conveniente hacer un repaso a las numerosas extensiones que se centran en este tipo de desarrollo, que son mostrar **galerías de imágenes en Joomla!**...

 [5 comentarios](#)

Once it's downloaded and installed, we have to publish it on the Frontend page.
In order to do this, we have to go to the **Menu Manager**, select one Menu and add a **new Item** on it. The Menu Item Type will be one of the types provided by the just installed component:

Archived Articles Single Article List All Categories Category Blog Category List Featured Articles Create Article	Search Newsfeeds List All News Feed Categories List News Feeds in a Category Single News Feed
Users Manager Login Form User Profile Edit User Profile Registration Form Username Reminder Request Password Reset	Search Search Form or Search Results
Xmap HTML Site map XML Sitemap	Weblinks List All Web Link Categories List Web Links in a Category Submit a Web Link
System Links External URL Menu Item Alias Text Separator	Wrapper Iframe Wrapper
	JoomGallery Category View: Default Layout Detail View: Default Layout Favourites: Default Layout Favourites: List Layout Gallery View: Default Layout Toplist: Default Layout Upload Form: Default Layout User Categories: Default Layout User Panel: Default Layout

Menu Manager: New Menu Item

Details

Menu Item Type *	Gallery View: Default Layout	Select
Menu Title *	Gallery	
Alias		
Note		
Link	index.php?option=com_joomgallery&view=gallery	
Status	Published ▼	
Access	Público ▼	
Menu Location *	Best teams in the Spanish league ▼	
Parent Item	Menu Item Root ▼	
Ordering	Ordering will be available after saving	
Target Window	Parent ▼	
Default Page	<input checked="" type="radio"/> No <input type="radio"/> Yes	
Language	All ▼	
Template Style	- Use Default - ▼	
ID	0	

And check if it appears on the frontend page:

Fútbol Pedro A. Ruiz

We are volunteers!

CERRAR INFORMACIÓN

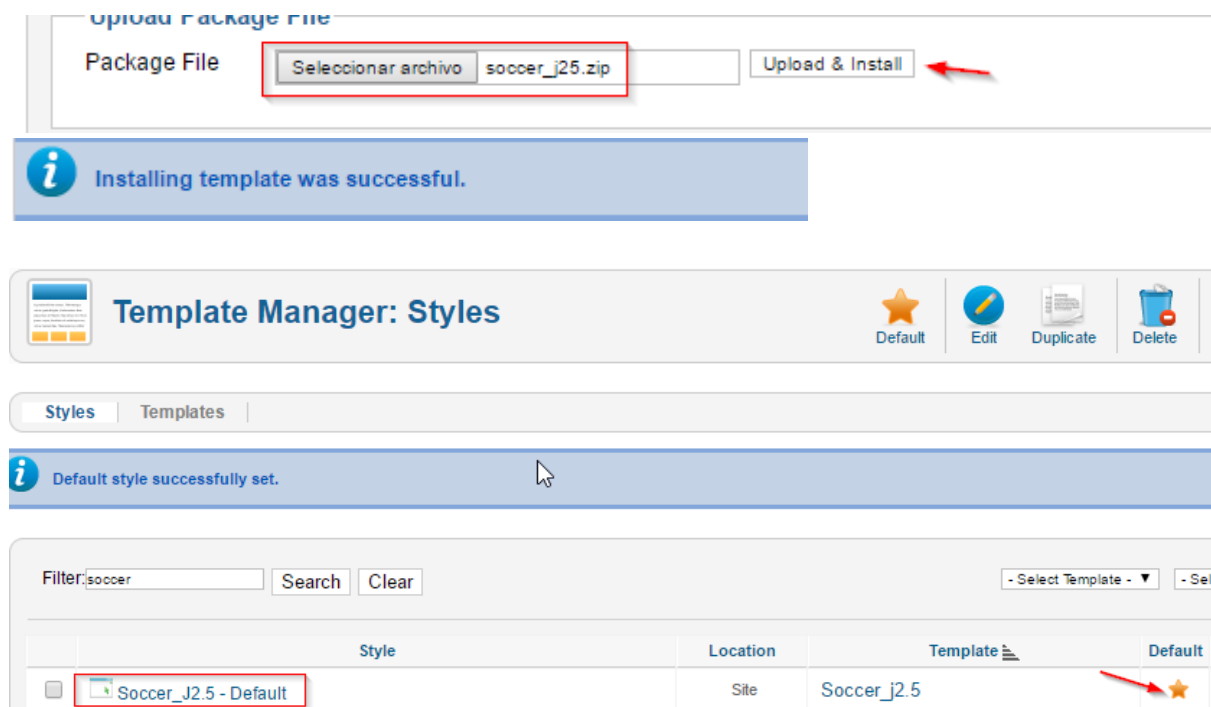

5. Instalar una plantilla nova

To download the Template we go to www.joomlaos.de, choose a Template and download it:

To upload the Template in our website we have to follow the same steps like on the previous exercises.

But once the Template is uploaded, we have to go to **Extensions** → **Template Manager** and search for the recently uploaded Template. We have to mark it as the *Default Template* with the Star:

Final step is to check if it has been applied on the **FrontEnd**:

Menú principal

- [Inicio](#)
- [Web de Fútbol](#)
- [Mapa del sitio](#)
- [Contacto](#)
- [Spanish football](#)
- [Real Madrid Football Club](#)
- [Login](#)
