1. Installation of Jommla.

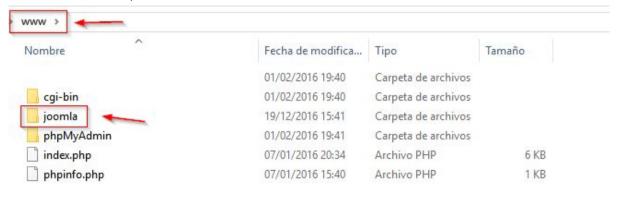

The first, we download **Joomla!** Versión 2.5.28 from the web page https://www.webempresa.com/descargas/pack_webempresa_joomla_25 28.zip.

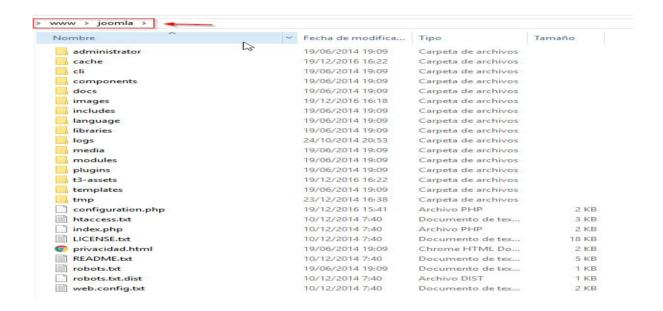

The second step is to create the database in phpmyadmin:

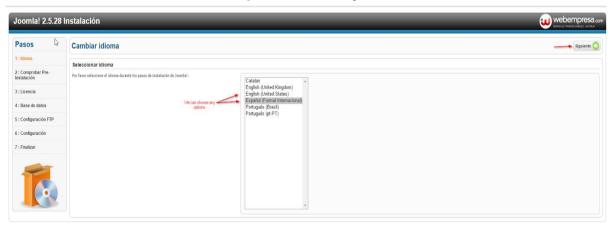

Now we must install **Joomla!**. To do this we must unzip the contents of the file that We have downloaded into a folder that we will call **joomla** in the **www** directory.

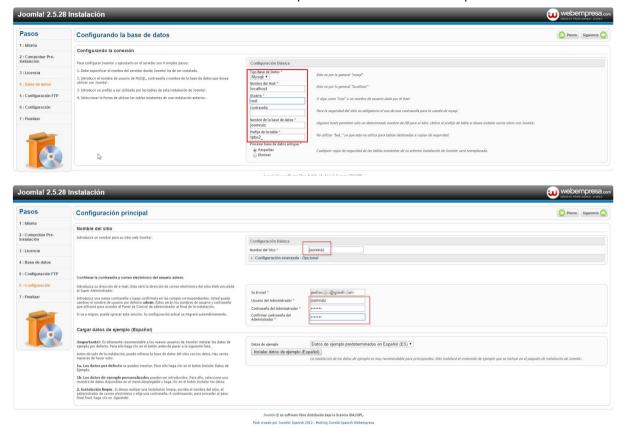

Now to start the installation, we have that open the navigator and put on the bar the next direction: http://localhost/joomla

Installation is very simple. We just have to follow the steps and enter the name of the database. I show the process with some captures:

When the process ends, we can go to the url **localhost/joomla** for to access the "**FrontEnd**"

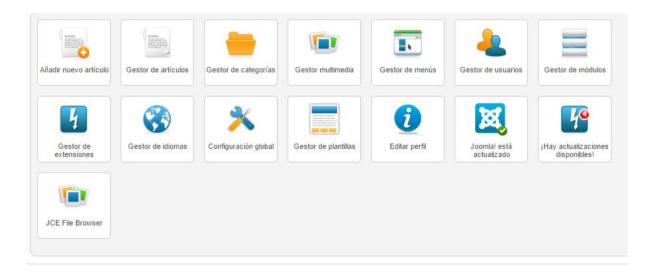

...or **localhost/joomla/administrator** for to access the "**BackEnd**". We will access the backend. When we access the backend we will have to enter our username and password.

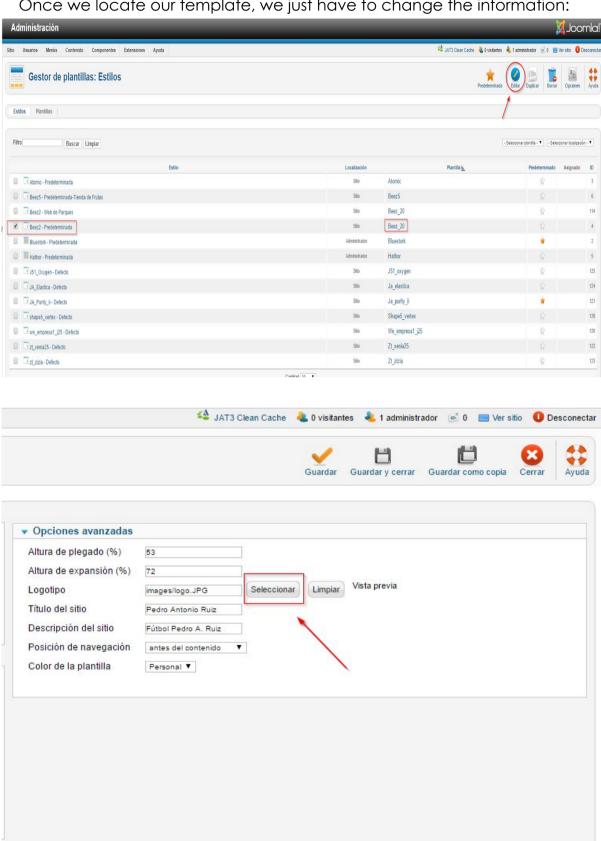

2. Change of logo of the web Joomla.

Once We type the credentials, We can check all of the administrator options.

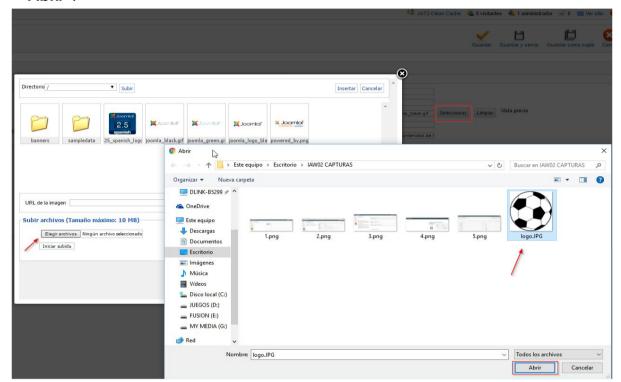

If we want to change the page logo, the title and description, we must click on the Extensions button and select "Gestor de plantillas".

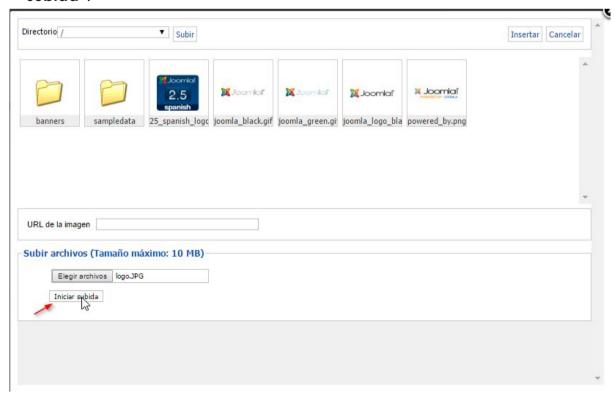

Once we locate our template, we just have to change the information:

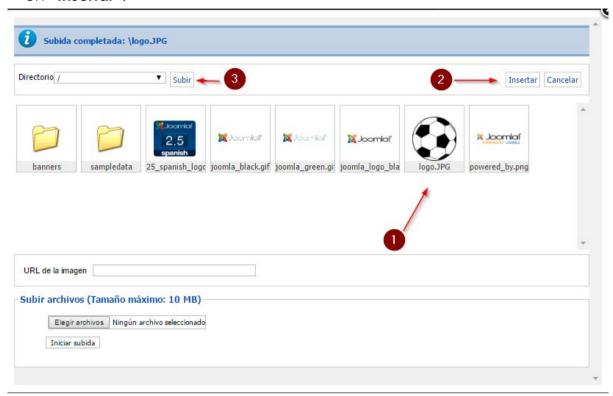

Now we have to select the image that we have saved as logo. We click on "Elegir archivos" and look in the location where it is stored. We click on "Abrir".

Once we have selected the logo we have to upload it. We click on "Iniciar subida".

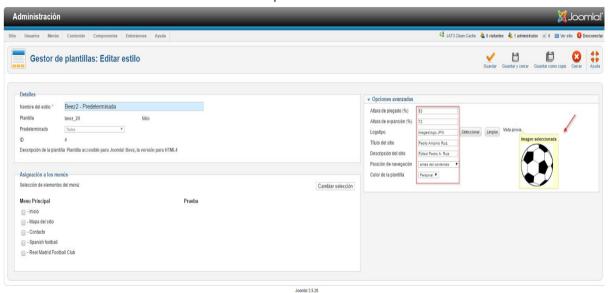

Once we have uploaded the logo, the only thing left is to insert it. We click on "Insertar".

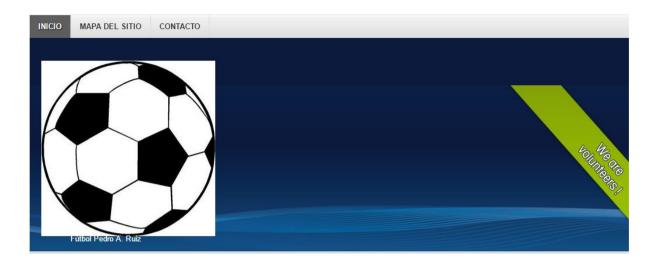

We can see that the logo has already been uploaded, now we only have to change the Title. For this we simply introduce the title in the field "**Título del sitio**". In our case **Fútbol Pedro Antonio Ruiz**.

Once we have filled in all the requested fields we click on "Guardar".

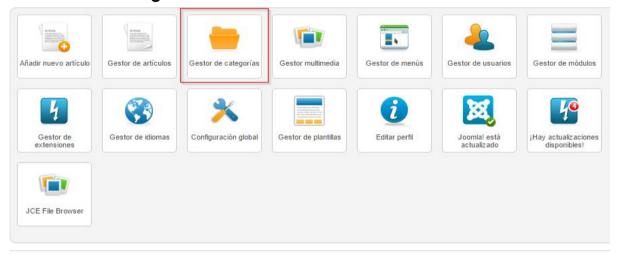

In the following capture we can already see the change of logo and title.

3. Creation of 2 categories.

Now let's create two categories. The first "Football history" and the second "Football teams". For to create these categories we have to click on "Gestor de categorías".

Once inside the category manager, click on "Nuevo".

In this section "Añadir una nueva categoría de artículos" We fill in the fields **Título, Alias** y **Descripción** as I show in the following capture:

We follow the same steps for the creation of the second category and click on **Guardar**.

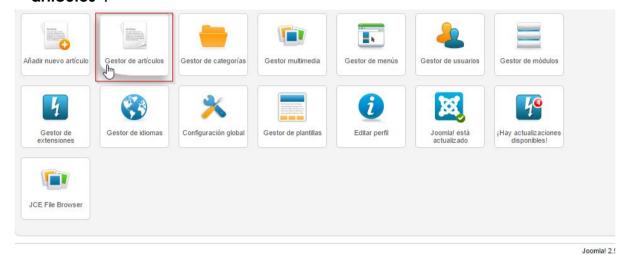

We can see in the catch that the categories have been created.

4. Creation of 2 articles.

The next step is to create two articles. Specifically "History of Spanish Soccer" and "Real Madrid Football Club". For this we click on "Gestor de artículos".

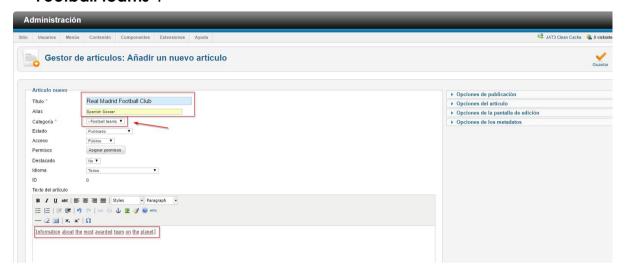

Once inside on Gestor de artículos we click on "Nuevo".

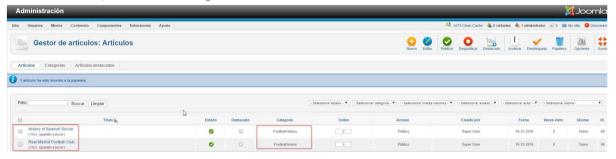

The first article will be called "History of Spanish Soccer". For this we fill the fields **Título**, **Alias** and in the drop-down menu **Categoría** we assign a category to the new article. In our case "**Football history**".

The second article will be called "**Real Madrid Football Club**". We fill the same fields as in the previous article but in the field **Categoría** We select "**Football teams**".

In the following we can see the new articles created and also the linkage to their respective categories.

5. Creation of 2 menu items.

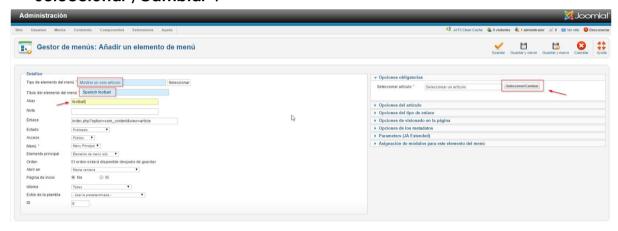

The next step is to add the new items to the menu. To do this click on "Gestor de menús".

Once inside on Gestor de menús click on the button "Nuevo".

Fill in the fields **Título del elemento menú**, **Alias**. In the field **Tipo de elemento del menú** click on "**Seleccionar**" and choose the option **Mostrar un solo artículo**. Now we go to the right part of the screen to select which will be the item that will appear in the menu. To do this click on "**Seleccionar /Cambiar**".

In the following capture we can see the previously created articles and the categories to which they belong. Select one for each menu item.

In the next capture we can see the already created menu items.
