1. Crear un nuevo menú
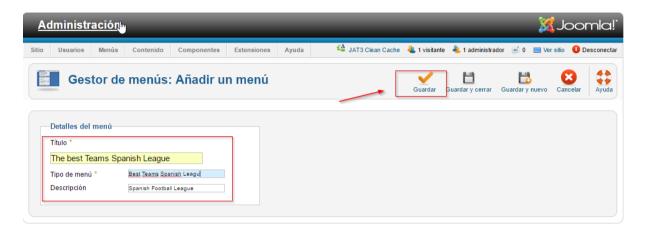

To create a contact, we enter the Joomla Backend "**localhost / joomla / administrator**".
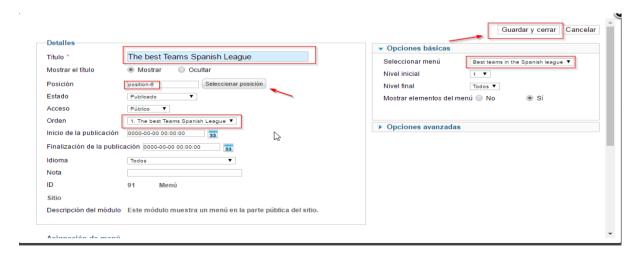

Click on *Menús → Gestor de menús → Añadir nuevo menu* and enter the information of the new menu and click **Guardar**.

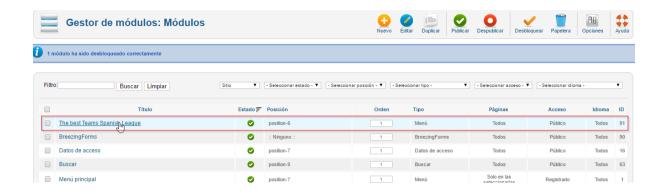

We keep and close. Now we can check that it already appears in the list of menus:

Now the next thing is to create a module for the menu that we just created. To do this click on the option on the right of the menu created **Añadir un módulo para este tipo de menú**. Fill in the fields with the information we want:
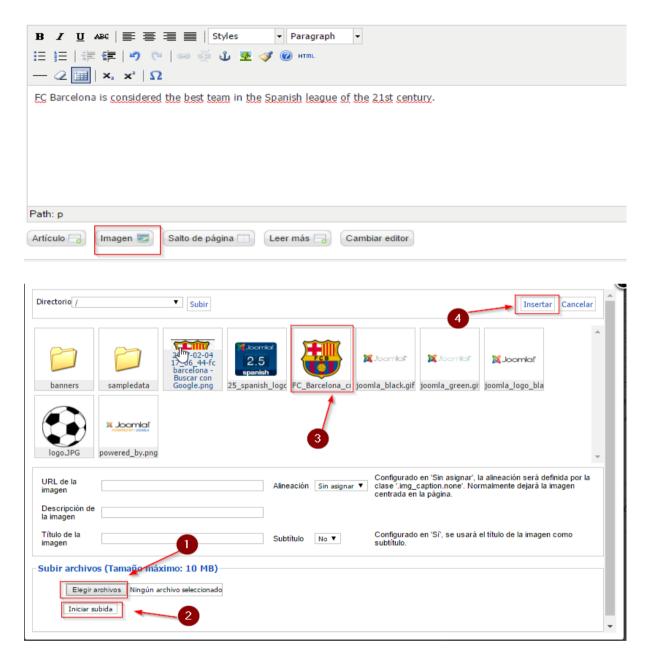

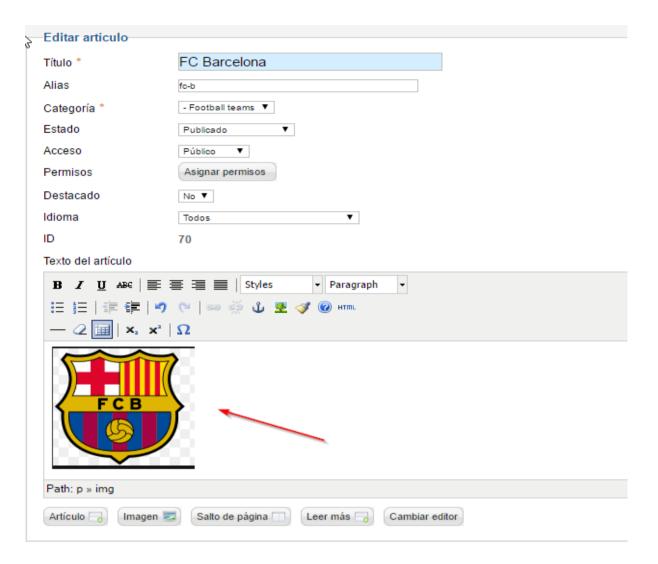

2. Crear un article amb una imatge i una opció de menú per mostrar aquest article. Després has de mostrar el menú en el FrontEnd

To create an article go to the initial administration page and click on the **Añadir nuevo artículo** option. We will fill in the fields with the information of the article:

The next thing is to add an image, for this we click on the **Imagen** option and in the window that opens of the section Upload files click on Browse, we look for the image in our equipment. Once located click on start upload and check that it appears loaded next to several images, select it and click on **Insertar**.
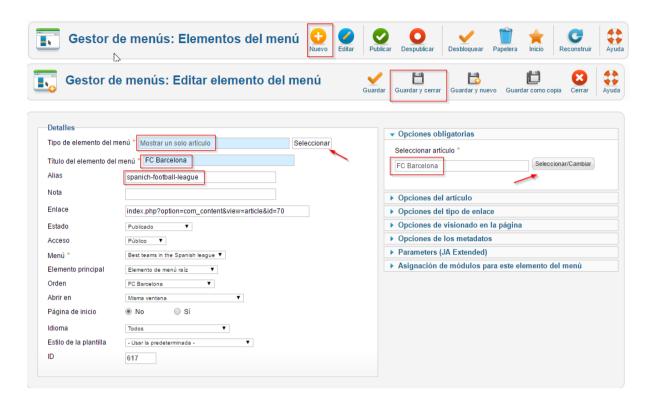

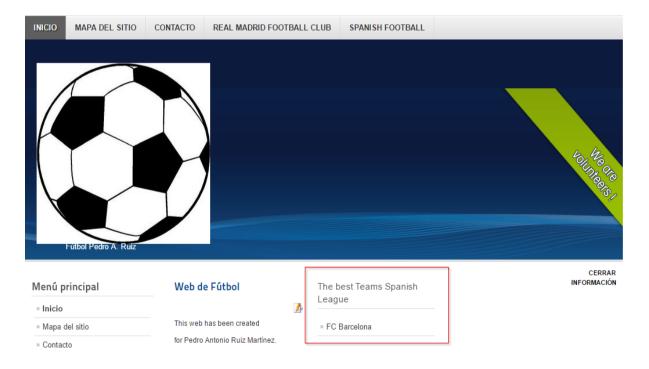

Now if we go to the article manager we can check how the article appears:

Now we go to the menu manager and we will create a new menu item to link the created article. To do this once in the **Gestor de menús** click on the menu created previously called "**The best Teams Spanish League**" and Click on **Nuevo**:

Once finished, we go to the **FrontEnd** and check if the created menu appears:

If we click on the menu appears the article:

3. Crear 2 usuarios

Now we are in the menu **Usuarios → Gestor de usuarios → Añadir nuevo usuarios** and we enter the **Nombre**, **Usuario**, **Contraseña**, **Correo electrónico** and the group of users that will belong in this case "Registrado" :

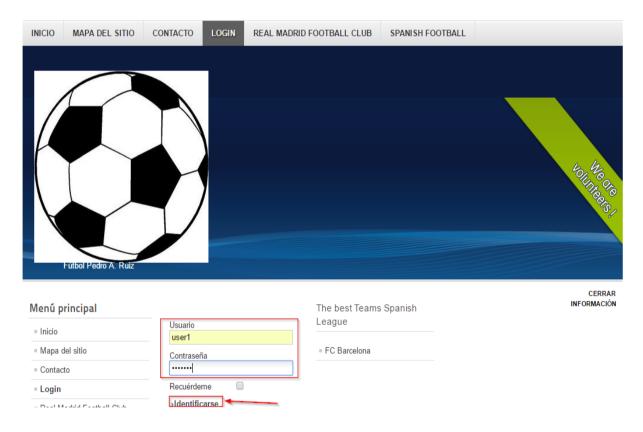

We follow the same steps to create the second user.

Now we check if the users (User1 and User2) have been created correctly:

Now we access the FrontEnd to see if it asks us for username and password:

Once we have identified us we will can to see our profile. The profile data we can see are the user, your name, registration date and last visit among others...
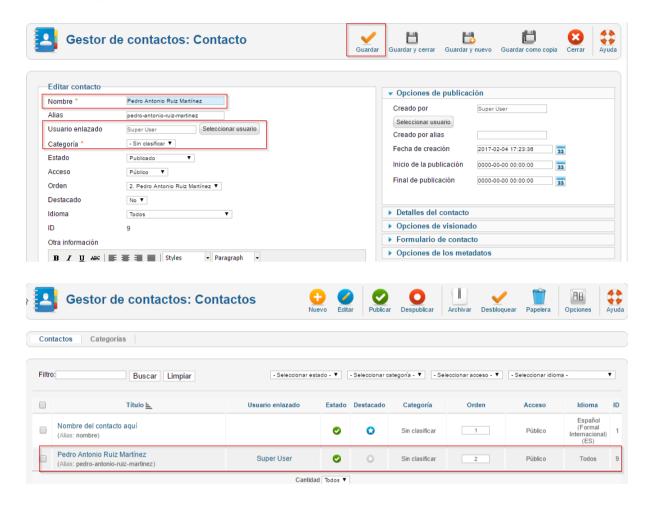

## 4. Crear un contacte i mostrar el formulari a la pantalla

To create a contact, we have to go to the menu above **Componentes →
Contactos → Contactos**. Click on **Nuevo**:

We fill in the fields **Nombre**, **Usuario enlazado** and **Categoría**, the rest we leave it by default:

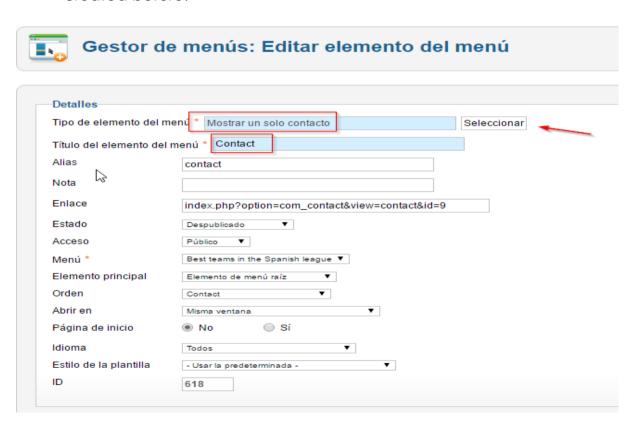

The next step will be create a menu item so that when we click on it appears the form. To do this within the **BackEnd** we go to ***Gestor de menús*** → → ***Best teams in the Spanish League*** → → ***Nuevo***:
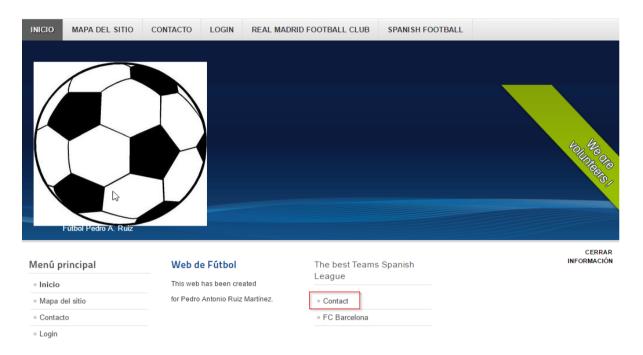

Once inside the menu manager editor fill in the fields:

- **Tipo de elemento del menú:** Click on "Seleccionar" and choose "Mostrar un solo contacto".
- **Título del elemento del menú:** Here we have to put the name or title that will have the menu.
- **Seleccionar un contacto:** on the right part of window on the "Opciones obligatorias", click on "Seleccionar" and choose the contact that we created before.
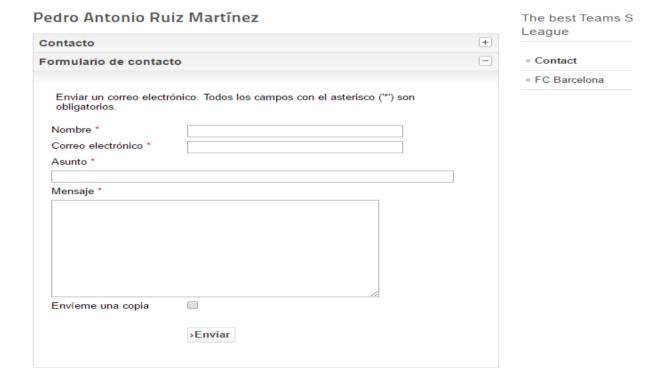

Now we go to the **FrontEnd** and we watch that appears the new option:

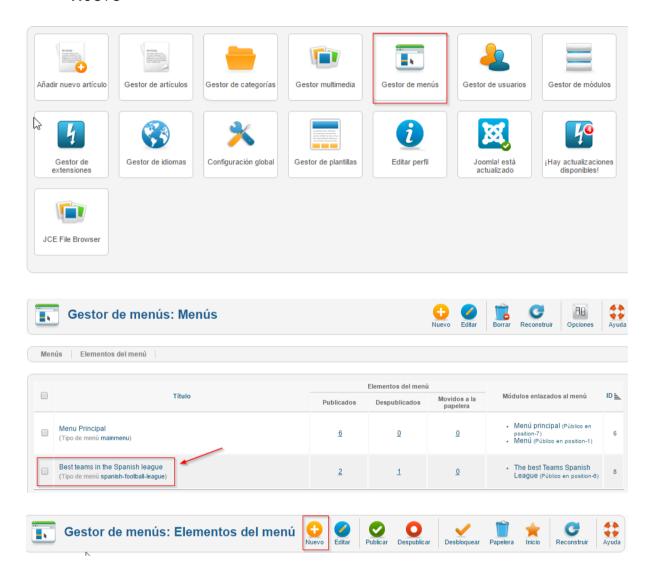

...and if we click on to the contact option we see the form:
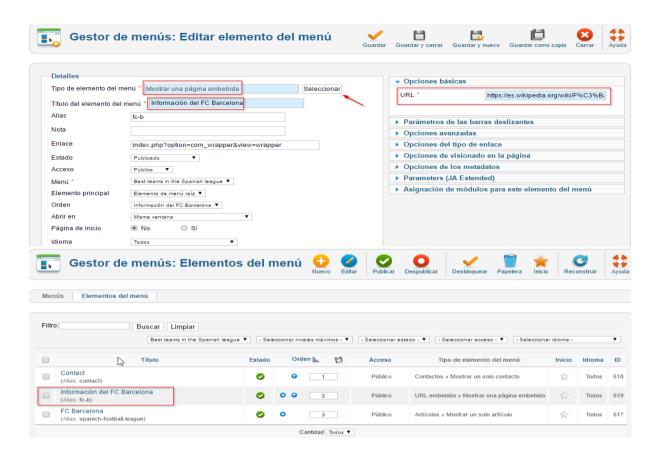

TASK IAW03
Pedro Antonio Ruiz Martínez

5. Mostrar una pàgina externa integrada dins el lloc web

We will create an external page integrated in our website, To do this from the BackEnd we go to *Gestor de menús → → Best teams in the Spanish League → → Nuevo*

Once inside to the menu element editor we fill in the next fields:
- **Tipo de elemento del menú:** Click on "Seleccionar" and choose "Mostrar una página embebida".
- **Título del elemento del menú:** Here we have to put the name or title that will have the menu.
- **Url:** We write the url of the page that we want to go. In our case the url belongs to a wikipedia link that gives us general information about the soccer team.

Now if we go to the FrontEnd and click on the new link will open the web that we have integrated:
